

Shopping trolley AT serie

Shopping trolley AT serie

The Anti Theft (AT) shopping trolley has no base frame, which means it is almost impossible to sneak products through the checkout undetected. So the AT shopping trolley helps to prevent stocktaking discrepancies. This trolley is supported by elegant, flat-oval tubes. The AT is produced in accordance with the European EN 1929 quality norm. The steel wire is high-gloss galvanised and chromated and has a hard, transparent powder coating.

Help your customers to have an enjoyable shopping experience with smooth-rolling, accurately steering shopping trolleys. Such as the shopping trolleys from DCR Europe. Our trolleys have top-quality wheels and always go where you want them to go. The standard wheels have a rubber tread and are fitted with precision ball-bearings so that they have a low rolling resistance. Available as fixed wheels and as caster wheels with sealed upper bearings. Soft plastic protective rings on the wheels and on the upper bearings protect the wheels against abrasion, dust and damage. A number of shopping trolley models have coloured plastic hubcaps as additional protection. The wheels are available in sizes of 100 mm or 125 mm

standard wheel 125mm

Euronorm 1929

The trolleys are produced and tested under the international quality guide for shopping trolleys EN 1929.

This guarantees you constant high quality products.
