

Shopping trolley SB serie

Shopping trolley SB serie

The Standard Base (SB) is the absolute classic of all our shopping trolleys. For years, this model has been our highest-selling shopping trolley. And with good reason. The trolley is extremely practical and suitable for almost all shops. The SB is manufactured from steel wire, is high-gloss galvanised and chromated and has a transparent powder coating.

The SB is available in eight sizes, from 60 to 275 litres. All models, except for the SB 60 litre, have a base grille for the transport of crates and other large objects. The SB shopping trolley is fitted as standard with plastic protective edges and corners, a rear flap with a child seat and wheels with ball-bearings. The trolley can be enhanced with various accessories.

SB 60

SB 100

SB 130

Help your customers to have an enjoyable shopping experience with smooth-rolling, accurately steering shopping trolleys. Such as the shopping trolleys from DCR Europe. Our trolleys have top-quality wheels and always go where you want them to go.

The standard wheels have a rubber tread and are fitted with precision ball-bearings so that they have a low rolling resistance. Available as fixed wheels and as caster wheels with sealed upper bearings. Soft plastic protective rings on the wheels and on the upper bearings protect the wheels against abrasion, dust and damage. A number of shopping trolley models have coloured plastic hubcaps as additional protection. The wheels are available in sizes of 100 mm or 125 mm

Standard wheel 125mm

Euronorm 1929

The trolleys are produced and tested under the international quality guide for shopping trolleys EN 1929.

This guarantees you constant high quality products.
